WHY????

REMEDIATION

Higher Education's
Bridge to Nowhere

PART 1: Bridge to Nowhere

Too many entering freshmen need remediation	6
Most students don't make it through college-level gateway courses	8
Most remedial students never graduate	10

WHY????

For the cohort of students with developmental requirements entering in **Fall 2010**, only **21%** completed entry-level collegiate courses in English and Mathematics within **2 years**.

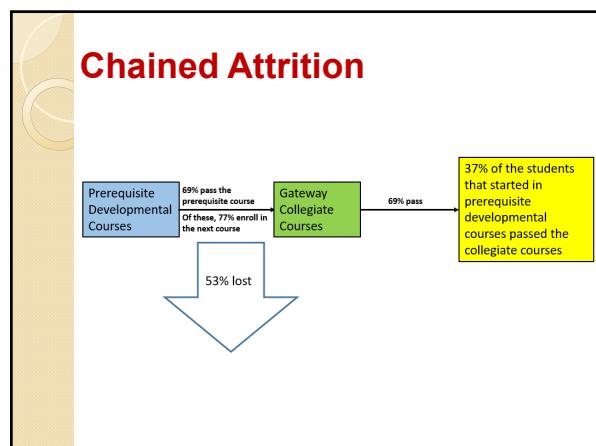

But . . .

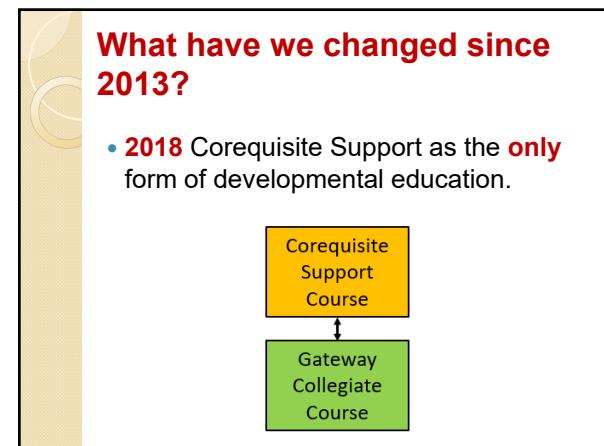

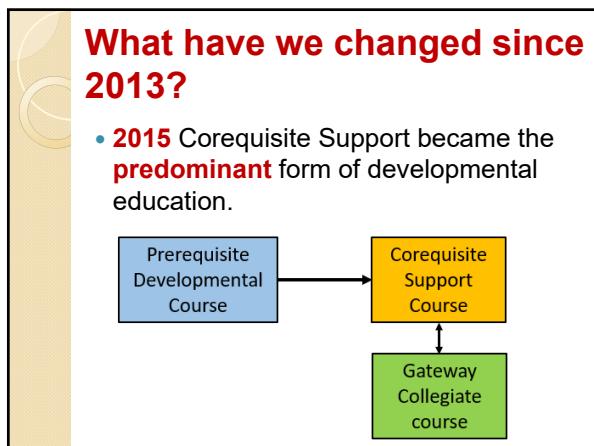

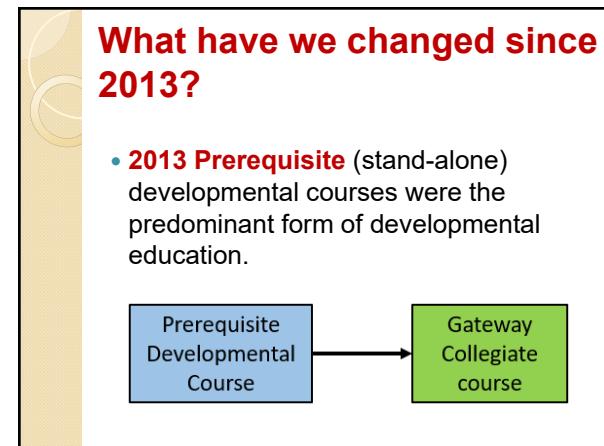

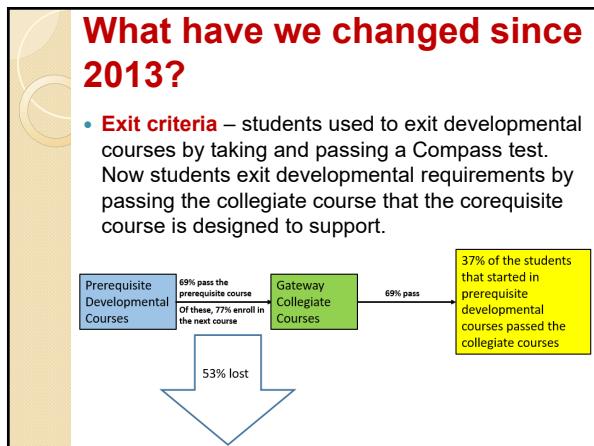

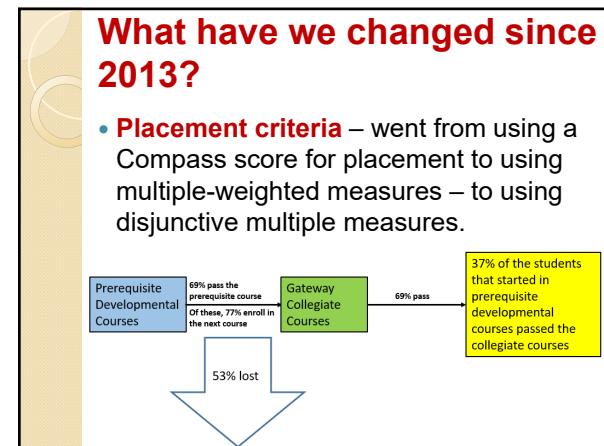

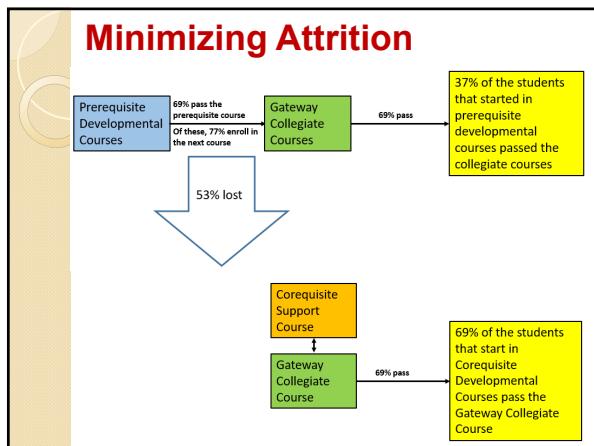

Students who completed prerequisite developmental courses did about as well in the entry-level collegiate course as students taking the courses without developmental requirements.

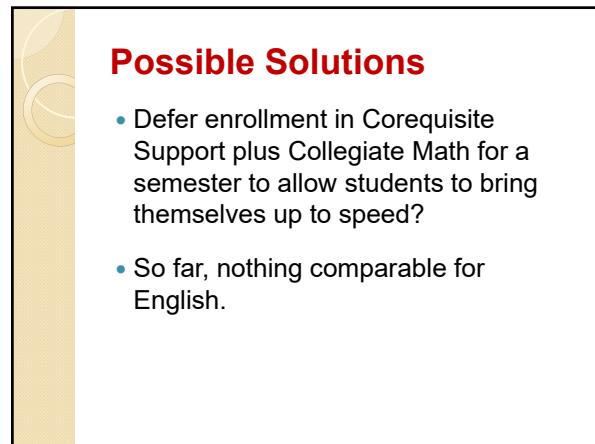

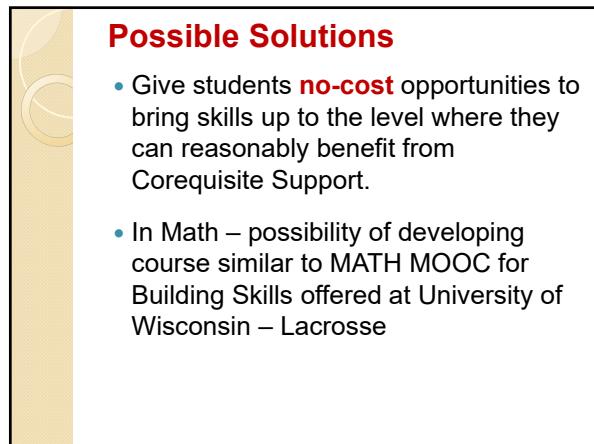

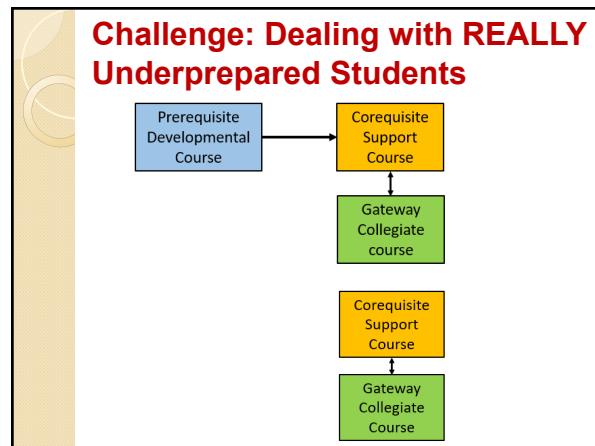

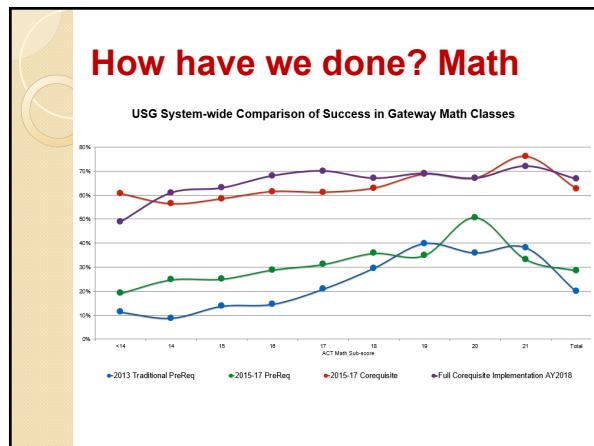

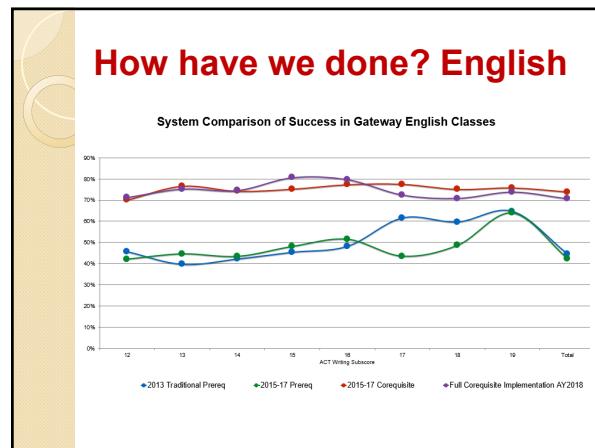

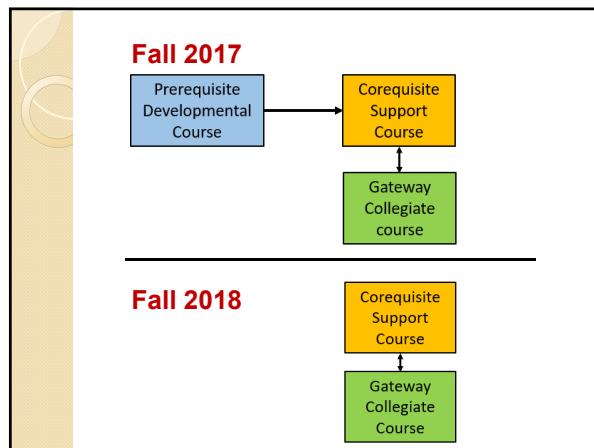

What's wrong with this picture?

```

graph LR
    A[Prerequisite Developmental Course] --> B[Gateway Collegiate course]
    B --> C["69% of students who passed prerequisite developmental courses and enrolled in the entry-level collegiate courses passed the gateway courses"]
    D[Gateway Collegiate course] --> E["72% of students who took the entry-level collegiate course without prerequisite developmental courses passed the gateway courses"]
    E --> F["53% lost"]
  
```

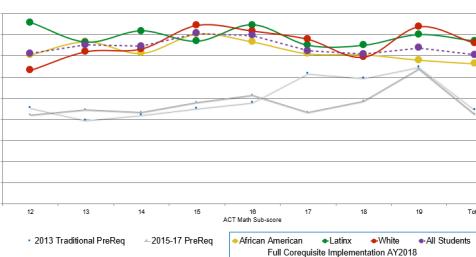

Equity? English

What Makes a Difference?

- ACT-SAT scores?
- High school grade point average?
- Credit hours in the Corequisite Support course?
- Model for the collegiate course: cohort vs. comingled?
- Same vs. different instructors for corequisite and collegiate sections?
- Alignment?

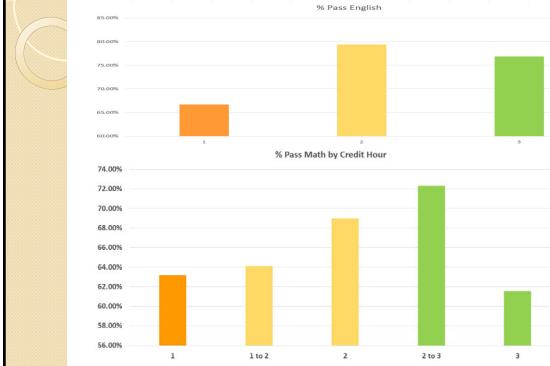

Credit Hours

- Corequisite Support sections may carry from 1 – 3 credit hours.
- Different sections of Corequisite Support may be tailored for different groups and offered for different amounts of credit.

Credit Hours

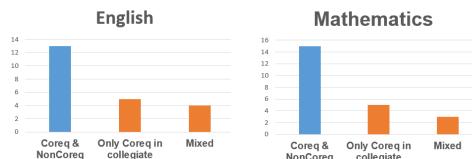

Corequisite Credit Hours

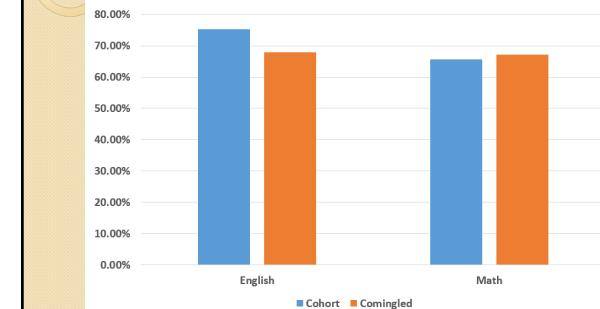

Cohort vs. Comingled Collegiate Sections

- Paired college-level course sections may have only students in Corequisite Support or a mix of students with and without Corequisite requirements.

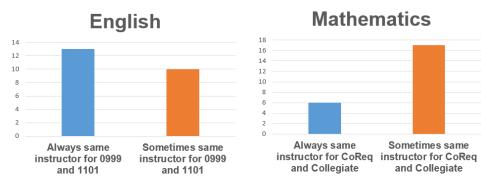

Pass Rates by Cohort vs. Comingled Collegiate Sections

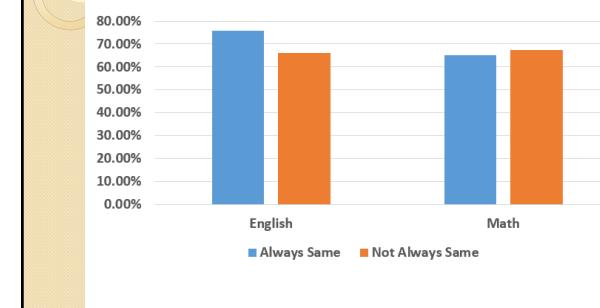

Same or different instructors

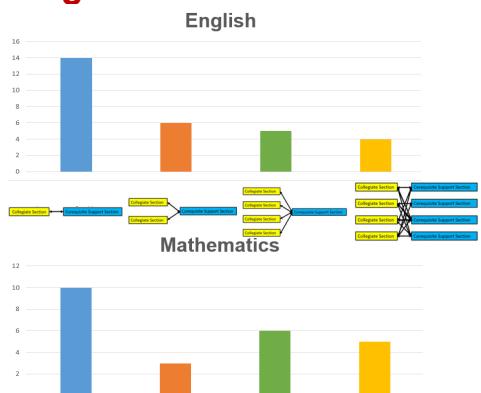

- Students may have the same instructor for both collegiate and Corequisite Support sections or different instructors.

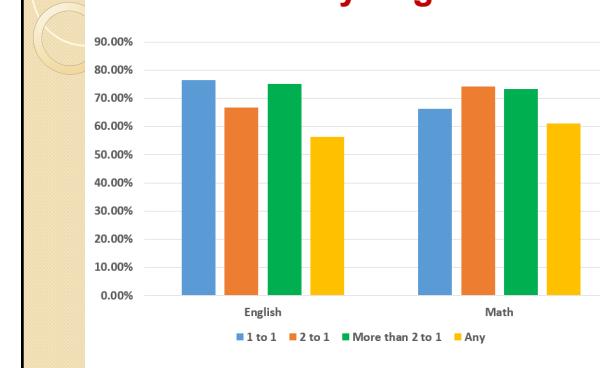

Pass Rates by Always Same vs. Not Always Same Instructor

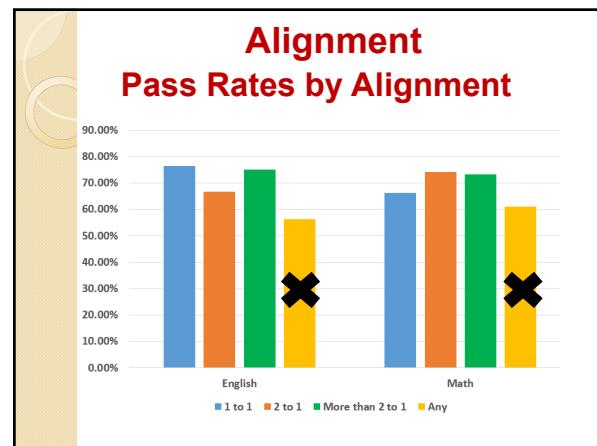

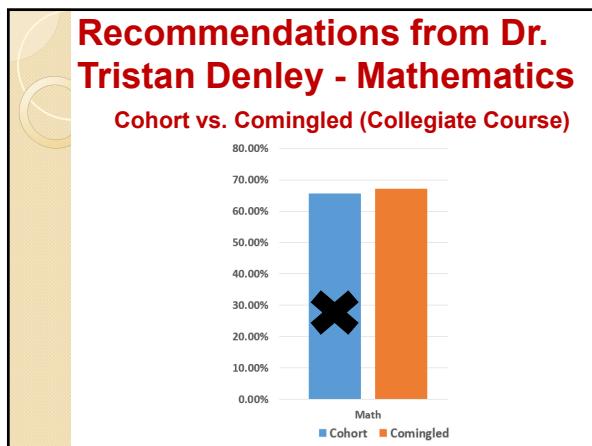

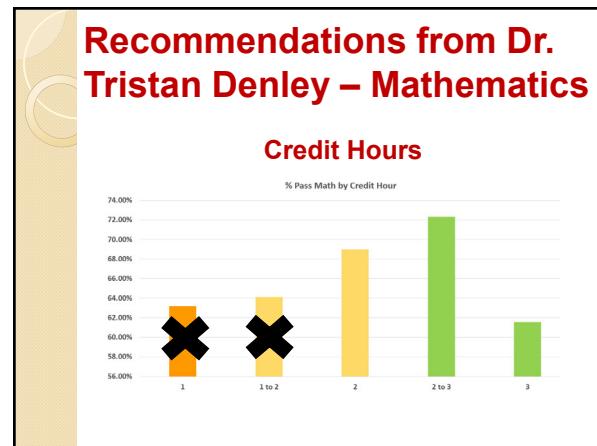

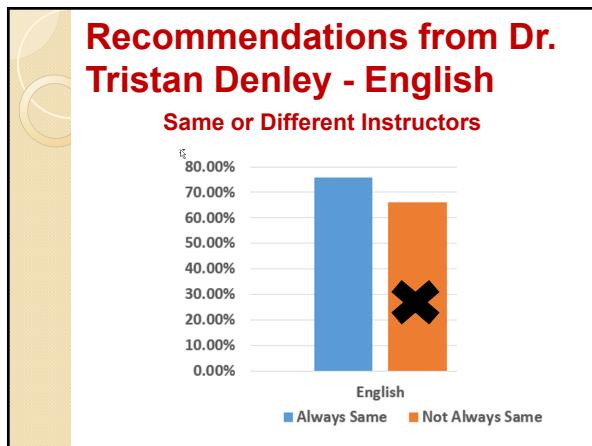

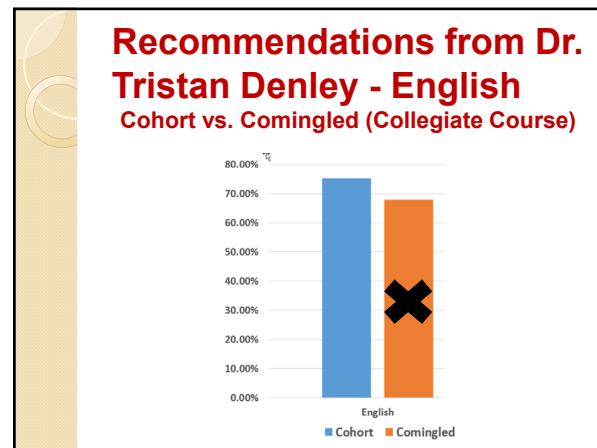

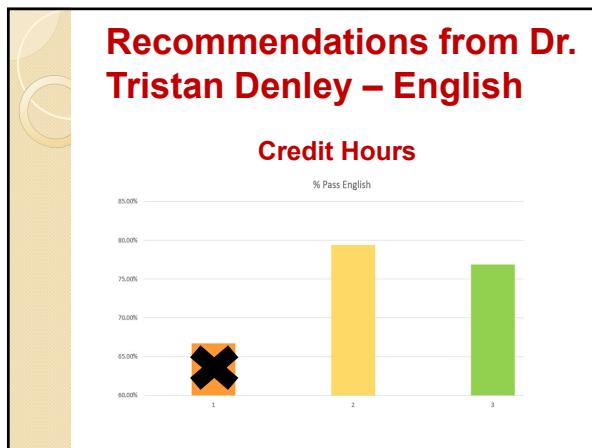

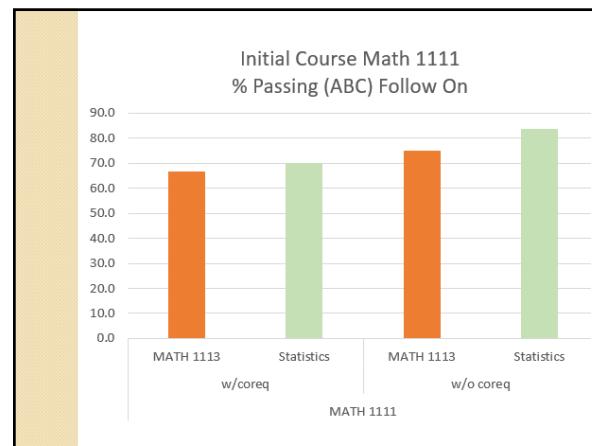

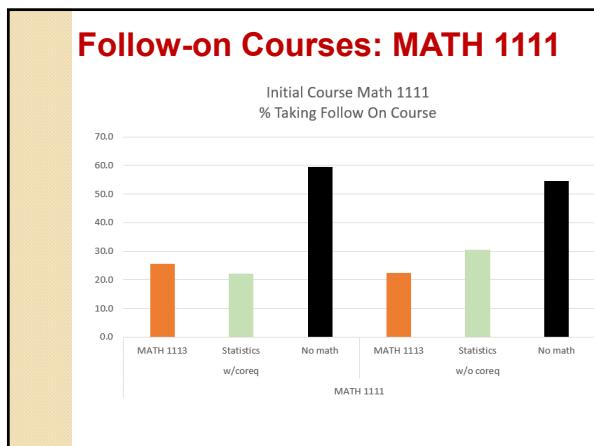

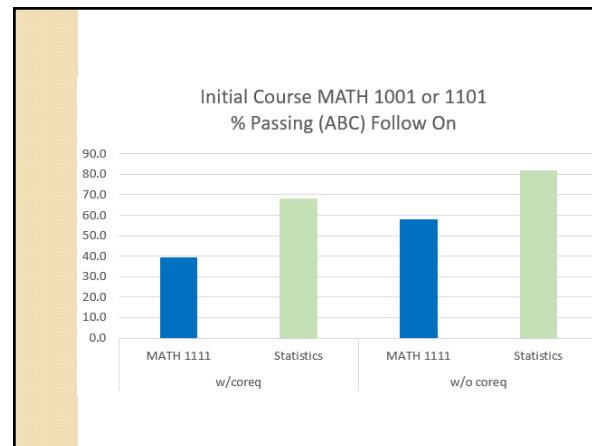

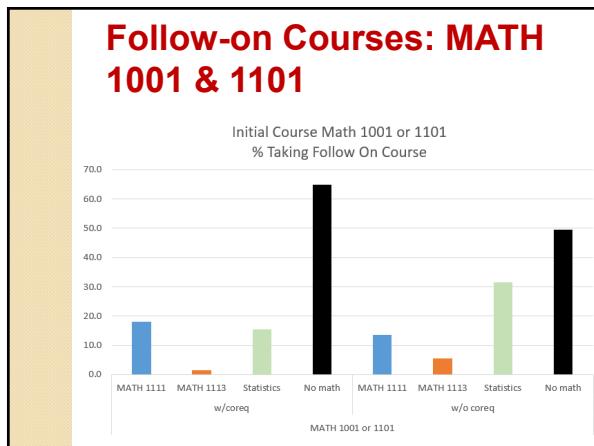

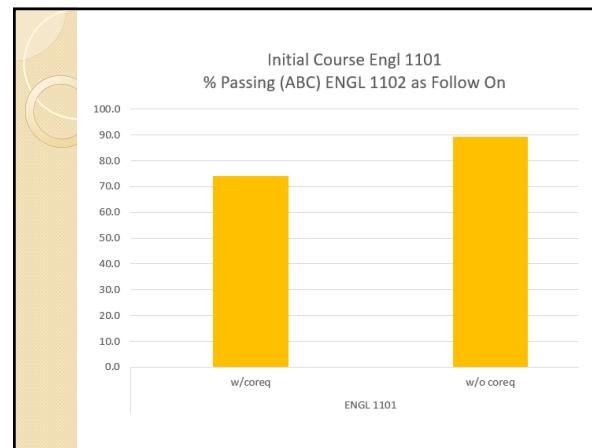

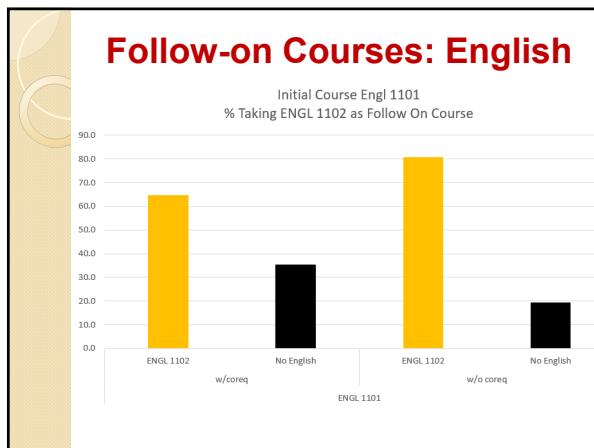

Alignment

Pass Rates by Alignment

Summary

- The move to fully Corequisite Support has resulted in a large increase in the number of students passing entry-level English and math courses.
- Students at all levels of preparation can be successful in entry-level collegiate courses with Corequisite Support.
- Completion of these entry-level courses is a “leading indicator” for successful degree completion.

Summary

- Most students who complete entry-level English and math courses with Corequisite Support are successful at the follow-on courses in those subjects.
- Students who complete basic math and English requirements in the first year are much more likely to complete degrees than those who don't.

Thank you!
